

September 15, 2003

Dear Entrepreneur:

The Office of Equal Opportunity and Public Contract Assistance is posting this solicitation package for certified minority and women-owned businesses. This listing contains upcoming projects in the Department's Clean Water State Revolving Fund and its Drinking Water State Revolving Fund. The following information has been included:

Project Sponsor and County	
Project Name	
Summary of Work	} may include one or more of these items
Scope of Work	
Description of Work	

**Anticipated Bid Advertisement Date:** The date the project will be advertised in selected newspapers and trade journals. (If available at time of publication)

**Anticipated Bid Opening Date:** The date the project sponsor will receive bids. (If available at time of publication)

**Anticipated Contract Award Date:** The date the contract is to be awarded to the lowest bidder. (If available at time of publication)

**Newspaper and Trade Journals:** Those selected periodicals where the bid solicitation notice will appear on the specified advertisement date. (If available at time of publication)

You may also receive notification from various contractors seeking quotes on portions of a project.

Should you have any questions regarding the attached information, please feel free to contact Valorie Truesdell or Lisa McLeon of my staff at (609)-984-9742.

Sincerely,

Pamela P. Lyons, Director  
Office of Equal Opportunity  
And Public Contract Assistance

C: V. Truesdell  
File

Borough of Beachwood  
Atlantic County, New Jersey

PROJECT NAME: Expansion of Well House and Installation of New Well #7

SCOPE OF WORK:

The work includes the installation of 750 GPM deep well turbine pump, valves, meter, pipe, fittings, and all disinfection, testing and appurtenances; demolition of Well House #6. Construction of new well house; furnish and install new emergency generator, electrical and mechanical work; including heating/air conditioning, controls, switches, etc., and landscape restoration and environmental maintenance necessary for completion.

This project or contract is funded in part by the New Jersey Environmental Infrastructure Trust. The successful bidder is required to meet a 10 percent utilization of small business concerns owned and controlled by socially and economically disadvantaged individuals (SEDs).

City of Bridgeton  
Cumberland County, New Jersey

PROJECT NAME: City of Bridgeton Water Department Phase II-B Radionuclide Compliance Project Electrical Service Upgrades for Well No. 22 from the South Woods State Prison

SCOPE OF WORK:

To provide the complete upgrading of the existing electrical service from the South Woods State Prison to the existing City of Bridgeton Well Nos. 18 and 21 Treatment Plant, to accomodate the addition of new Well No. 22 and treatment equipment. The work includes the complete and satisfactory installation, testing and placing into a new underground electrical service from the South Woods State Prison switchgear to the existing Well Nos. 18 and 21 treatment plant motor control center. All work shall be performed by a qualified electrician licensed in the State of New Jersey.

DESCRIPTION OF WORK:

The description of work for this project shall include, but not limited to, providing the following:

1. All site work including mobilization and demobilization, site stake-out, utility markouts, clearing, excavation, installation of all required temporary soil erosion and sediment control devices, including silt fences and temporary construction entrances, stockpiling, storage and disposal of material, site restoration, dust control, noise control, preconstruction photographs, clean-up, final grading and landscaping.
2. All new electrical conduit required for the upgrading of the existing underground electrical service, including all pipe, fittings, excavation, trenching and backfilling as required to complete the installation. This work shall also include the jacking and boring of new electrical conduit under the existing traveled way and right-of-way areas of South Burlington Road, including all excavation, backfilling and permanent grade restoration required for the jacking and receiving pits.
3. All new electrical feed conductors for the complete upgrading the existing electrical service, including all spare conductors and grounds.
4. All new breakers, feeders and disconnects and connections to existing equipment for the complete electrical service upgrade.

Camden County MUA  
Camden County, New Jersey

PROJECT NAME: Construction of a New Well Chamber & Outfall Pipe for Delaware  
No. 1 WPCF

DESCRIPTION OF WORK:

The modifications will include extending the two existing 60" diameter out-fall pipes into a new steel sheet pile well chamber with final discharge through a new submerged 72" diameter pipe outfitted with a 54" nozzle and supported by submerged pipe supports. The discharge point of the nozzle is intended to be located at or below - 20.00 Mean Low Water (MLW).

SCOPE OF WORK:

The major items of work are as follows:

1. Complete all field engineering including land-based and marine-based surveys, and underwater verifications.
2. Demolish existing marine obstructions.
3. Install new submerged pipe supports.
4. Modify two existing 60" diameter out-fall nozzles and install temporary out-fall diversion pipes.
5. Construct a new sheet pile Well Chamber.
6. Install a new 72" diameter Combined Out-Fall pipe extension.
7. Extend two 60" diameter steel out-fall pipes located between the existing pair and the new Well Chamber.
8. Commission new out-fall extension into full operation.
9. Salvage and return to the Owner two temporary diversion pipes.

NOTE:

Camden, NJ 08101

This project or contract is funded in part by the New Jersey Environmental Infrastructure Trust. The successful bidder is required to meet a 10 percent utilization of small business concerns owned and controlled by socially and economically disadvantaged individuals (SEDs).

Clinton Township Sewerage Authority  
Hunterdon County, New Jersey

PROJECT NAME: Cramer's Creek and Deer Meadow Mini Pumping Station  
Rehabilitation.

SCOPE OF WORK:

The work consists of the rehabilitation of two sewage pumping stations.

The rehabilitation of the Cramer's Creek & Deer Meadow Pumping Stations includes, but not limited to, raising the ground elevation as the south side of the pumping station, construction of a new retaining wall, installation of new chain link fencing, installation of new submersible pumps and controls, a new aeration blower system and a new standby generator, installation of new roofing on an existing control building, widening and repaving of the existing access driveway, installation of a new bypass pumping chamber and construction of a new drainage swale with a trench drain.

The rehabilitation of the Deer Meadow Mini Pumping Station includes, but is not limited to, furnishing and installation of a new pre-engineered and packaged mini pumping station, diversion of an existing service lateral to the new pumping station and abandonment of the existing pump station.

Mount Laurel MUA  
Burlington County, New Jersey

PROJECT NAME:      Aquifer Storage and Recovery Well #7

SCOPE OF WORK:

The project contemplated consists of modification of the existing Well 7 facility to ASR, increasing the pumping capacity of Well 7; installation of an observation well, conduct a 72 hour aquifer test; installation of an emergency electrical generator, and modification of mechanical, electrical, and instrumentation and control systems, and related site work.

PROJECT DESCRIPTION:

The Work will be substantially complete within 174 calendar days from the date when the Contract Times commence to run. The Work will be finally complete in 234 days from the date when Contract Times commence. The Work will be considered Substantially Complete installation of the observation well, and the 72-hour aquifer test program must be completed by the Substantial Completion date. Other activities that must be completed to begin recharge operations include the following:

1.      Installation of the new pump, motor, and motor control center for Well 7.
2.      Completion of building addition, chemical feed facilities, and instrument and control systems.
3.      Installation of all lighting, heating, and ventilation systems in facility.
4.      Removal and closure of underground storage tank.
5.      Modification of underground piping and storm sewer at Elbow Lane Treatment Plant.
6.      Installation of emergency generator and transfer switch.
7.      Installation of 60-inch diameter chloride contact chamber and underground piping.
8.      Site work to allow delivery of chemicals.

NOTE:

Linden Roselle Sewerage Authority  
Union County, New Jersey

PROJECT NAME:      Sludge Handling Facilities Upgrade

SCOPE OF WORK:

The work includes, but is not necessarily limited to, the following:

1. Mobilization to, and demobilization from, the site;
2. All field engineering and surveying;
3. Installation of all temporary facilities, including design where appropriate, required to stage personnel, equipment and materials necessary to perform the Work;
4. Implementation of erosion, sedimentation and pollution control measures;
5. Preparation and implementation of a project specific Dewatering Plan;
6. Site preparatory activities, including but not limited to, acquisition of all necessary permits, construction of temporary access roads, installation of temporary fences and gates, and clearing and grubbing;
7. Development and implementation of all traffic control plan, equipment, materials, and labor required to facilitate the project;
8. Furnishing and installing 60-inch raw water piping;
9. Furnishing and installing a steel jacking sleeve for a 60-inch raw water piping;
10. Furnishing and installing valves, blowoffs, all appurtenances and incidentals;
11. Landscaping and re-vegetation of all disturbed areas;
12. System start-up, commissioning and preparation of O&M manuals;
13. Construction photography;
14. Preparation of progress reports, submittals and as-built drawings;
15. Miscellaneous work and cleanup.
16. Coordination with Contract for improvements to the Raw Water Pump Station.

City of New Brunswick  
Middlesex County, New Jersey

PROJECT NAME: Remsen Avenue Area Storm Sewer Improvements

SCOPE OF WORK:

The project generally consists of the structural and hydraulic rehabilitation of the existing main, known as the Remsen Avenue Area storm sewer system. Type of improvements included, but are not limited to, interior shotcrete/gunite operations and pipe replacement. In addition to the above, the project calls for the installation of alternate storm sewer pipe alignments, the relocation of water mains and sanitary sewer mains. All sanitary sewer connections to the existing storm sewer system must be relocated to the sanitary sewer system.

The rehabilitation of the existing system shall include the reconstruction of sewer inverts, construction/reconstruction of access points along the existing alignment, structural rehabilitation of the existing system and restoration of all disturbed areas.

City of Perth Amboy  
Middlesex County, New Jersey

PROJECT NAME: Replacement of Catch Basins

SCOPE OF WORK:

The work involves the cutting, removal, and replacement of existing pavements of various types, excavation to the pertinent catch basins, as directed by the engineer or his representative. Native backfill will be used as frequently as possible; however ¾" clean stone is required when backfilling all trenches. All disturbed sidewalks, curbs, and streets paving shall be replaced in a manner resulting in a condition equal to or better than previously existed and of a similar type material as was removed, unless otherwise directed. Wherever catch basins are removed, they shall be replaced by complete new catch basins with new casting. The old casting will remain the property of the City of Perth Amboy. The work is located within the City of Perth Amboy.
